

Galina Fendikevich

The antidote to AI hype.

~~You're already behind.~~ ~~AI will do your job.~~ ~~One prompt, job done.~~ ~~Agentic everything.~~

I bring the operator's view of AI adoption to the people in the storm doing the work. Your audience leaves with a plan they can run tomorrow.

SIGNATURE KEYNOTE

How to Keep Up When Technology Rewrites the Rules

A practical keynote for leaders and teams navigating AI, automation and constant change. Real operator stories instead of vendor promises, plus a five step plan your people can use the next day.

YOUR TEAM WALKS IN THINKING

THEY WALK OUT KNOWING

We're already behind.

→ We know where to begin.

We need a huge AI strategy.

→ We can start with one meaningful problem.

Our people aren't ready.

→ Our people can become part of the solution.

We need to know where AI is going.

→ We need a way to respond as it changes.

We should automate everything we can.

→ We can decide deliberately what stays human.

THE FIVE STEP PLAN, NO BUDGET REQUIRED

1

Write it down

2

Pick one headache

3

Train together

4

Name what stays human

5

Show the proof

WHAT AUDIENCES SAY

"It felt really good to know that somebody else came at it from an operator perspective as opposed to the AI company."

Nicholas Hanges, CFO, Five Star Group of Companies

"Galina had put together a five step plan to work on your next AI project, which I'm going to utilize for some of my company's projects."

Mardaasa Addisu, National Supply Chain Manager, Airgas

**One talk.
40 people.**

After my SCCONF keynote, a CFO challenged his AI team to bring the one task they dread and kill it together. "I got a bunch of hell yeahs after the meeting. And we're doing it."

BUILT FOR

- Executive leadership teams
- Operations leaders
- Transformation and innovation leaders
- Technology leaders
- Managers and teams adopting new tools

FORMATS

- **Conference keynote** 20 to 45 minutes, tailored to your industry
- **Internal AI kickoff** for leadership teams and upskilling programs
- **Workshop: Remove the One Thing You Dread** everyone maps one real workflow

RECENT STAGES

- SCCONF 2026, Supply Chain Conference
- Council of Supply Chain Management Professionals
- RECYNOVA
- New York State Society of CPAs

I've built and sold this technology. Machine learning on Wall Street, a company I co founded acquired by Niantic, and U.S. go to market for a generative AI unicorn. Now I'm the founder of **Artificial Reality**, where I interview business owners and operators about what's really working with AI. I speed run life and my passport is always ready.

Give your audience a plan they can use the next day.
